HTML5

CSS3

JAVASCRIPT

BOOTSTRAP

ANGULAR JS 1

GIT

SUBLIME TEXT

## PERSONAL PROJECTS

**MULTIPLEX MANAGEMENT SYSTEM (01/2017 – 05/2017)**

- Overview:- This Project basically manages the ticket booking process of a multiplex, providing an interface to the user to book movie tickets in an easier way. The project proceeds through a sequence of well-designed forms provided with validations to ensure consistency, reliability and most importantly correctness of information fed into the database.
- Role Description:- There were many sub modules which was handled by me but some UI such as Login screen, ticket booking part & Registration page module were fully developed by me. The main focusing was on frontend integration, all of these modules being developed using JavaScript, Html, css, and bootstrap technologies. The whole project is responsive and free from the browser dependencies.

## ACHIEVEMENTS

- Bagged Third prize in Discus Throw . (10/2009)
- Member of Anti-Raging Community (08/2016 – 04/2017)
